

THE COMPANY

DESIGN:

Adventure Trailers (AT®) thinks outside mainstream traditions. Building strength, function, and style through design, AT has earned a reputation for state of the art products.

INNOVATION:

Adventure Trailers looks at every situation from a new angle, we think beyond existing technology, and pioneer new solutions. AT's products are unique; they including their advanced trailer suspension systems, their can holder with no hinge, and the incorporation of composite materials into their products.

PRODUCTION:

Trailers are assembled in house to our exacting standards, with our unique components made by ISO:9001 vendors, or local craftsmen. Adventure Trailers manufactures Off-Road Trailers, Composite Drawer Systems, and Can Holders.

R&D:

AT invests heavily in Research and Development. We have developed a unique Trailing Arm Suspension System (TASS) utilizing independent trailing arms with Airshocks, as well as researching non traditional components used in other industries. We are constantly prototyping new product.

INTEGRITY:

All the old fashioned ideas such as, honesty, reliability, honor, and truthfulness guide our decisions as a company.

FUTURE:

Adventure Trailers is invested in new trailer designs using both traditional and cutting edge materials and components. As we move ahead in 2009 we are excited to bring new product to market.

THE PEOPLE BEHIND AT

Adventure Trailers was started in 2001 by Martyn Davies and Mario Donovan. The facility is located in Montclair, California, having expanded from its humble beginnings in Martyn's garage in Truckee, California.

Although much has changed as the company has grown, the basic principles have remained the same: Produce trailers that are the best Built for Off-Road® trailers in the world and maintain extremely high standards of quality control and integrity. No trailer leaves our shop that we wouldn't be proud to take home ourselves.

MARTYN DAVIES:

Martyn is a Vice President at Adventure Trailers. His main areas of responsibility are Sales, Marketing, Branding, Internet interface, and customer service.

He is a Geologist by training, but for twenty five years he was a Professional Ski Instructor, and ski bum.

Martyn has traveled extensively through Africa, Europe, the Middle East, and North and Central America for work and pleasure.

The concept of an all terrain trailer came to him as he reached middle age and he found sleeping on the ground less than comfortable.

Martyn lives in Truckee, California, close to Lake Tahoe, with his wife and daughter.

MARIO DONOVAN:

Mario is a Vice President with Adventure Trailers. His main areas of responsibility are Design, Development, Production & Manufacturing, Facility Management, and Customer Service.

Mario hails from California via a circuitous route that includes time spent living in East Africa and numerous travels to places in between. He started travelling Overland by motorcycle & 4x4 as a teen in Africa and has never stopped pursuing far off places.

Mario has a 27 year technical and managerial background in the Printing & Publishing industry which he left to start AT in pursuit of his passion for travel and design of Overland equipment.

As a practitioner in many of the manual and adventure arts, he is the designer behind ATs core products and the companies' official crash test dummy.

PRODUCTS:

HORIZON TRAILER

The trailer was designed around the concept of setting up camp in 10 minutes with all the accessories at hand to make camping a luxury experience. The Horizon is fully capable of following the tow vehicle on any trail, but equally at home on the Freeway. Built on a solid chassis, with the refined TASS suspension system, its three strong welded boxes provide 54 cubic feet of storage .

CHASER TRAILER

The work horse of the line, equally at home supporting expeditions in the Arctic, as it is with family weekends into the bush. A straight forward simple design with clean lines, the trailer has 46 cubic feet of storage. The Chaser can be fully optioned with everything you need to make life comfortable when camping. Built on an almost identical chassis as the Horizon, using the TASS suspension, this trailer is simple and dependable.

DRAWER SYSTEMS

Composite drawer systems can organize the back of any vehicle. Light weight and tough, the drawers come as a flat packed kit and are easy to assemble and fit. Designed by a cabinet maker, the drawers are everything you would expect from high end cabinetry while providing expedition toughness. All of the drawers are 20" wide, with the option of having them 24" or 36" deep. You can order them in 8.75" or 12" heights.

PRODUCTS CONTINUED:

CAN HOLDERS

Frustrated by the quality of can holders on the market, **AT** designed their own holder. The can holder has no hinges or moving parts, and they are an expedition quality product. The holders will fit any Wedco style 5 gallon can.

COMPONENTS

In addition to designing trailers **AT** designs many of the component parts for their trailers, having them manufactured by ISO:9001 vendors, or local craftsmen. The parts they design include:

- Trailing arms
- Bushings
- Air Bag brackets
- Roof Bars
- Tongue parts

CUSTOM WORK

Along with their production models, **AT** produces special custom trailers for customers, which have ranged from ATV trailers, to enclosed motorcycle trailers, to Medical Emergency Trailers. Adventure Trailers designs trailers for Government use.

EXPEDITION EQUIPMENT

In addition to manufacturing products Adventure Trailers sells high end Expedition Equipment including :

- Fiamma and Eezi Awn Awnings
- Zodi Showers
- Baja Racks
- Extreme Air Compressors and Tire Tools
- Engel Fridges
- Eezi Awn Tents
- Multi Axis Couplers
- Partner Steel Stoves
- Solar Panels, rigid and foldable

ADVERTISEMENTS

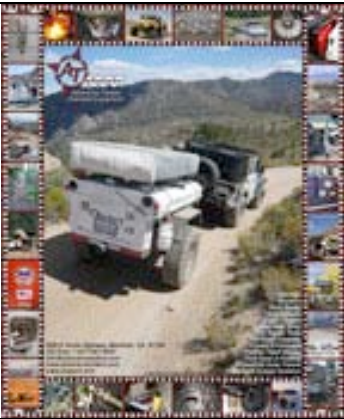

In all of the **AT** advertisements our aim is to be creative and original. We try to show the spirit in which our owners use their trailers and the environment in which they find themselves.
