

## HORIZON TRAILER

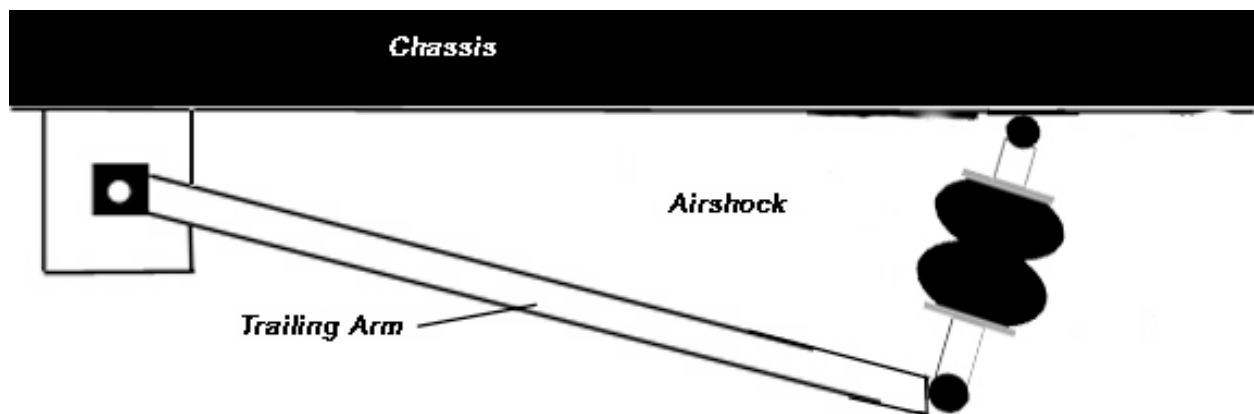

### HORIZON BASE TRAILER

The Horizon base trailer consists of the chassis made from 2X3 inch (50.8 mm X 76.2 mm) rectangular steel tube 1/8" (3.175 mm) thick with a 2X5 rear (50.8 mm X 127 mm) bumper 3/16" thick (4.75mm). The Chassis has side protection bars before and after the axle. The tongue of the trailer has a 2 inch receiver tube welded into the chassis to enable the use of any coupler. The welded chassis is powder coated black.

### TRAILING ARM SUSPENSION

The suspension consists of two powder coated trailing arms, and single unit air bag/shock absorber.

DROP LEG JACK AND STEEL WHEEL.

The 5000 lb rated front drop leg jack has a steel wheel

The main cargo box the floor has rubber matting, and stainless steel tie downs.

The tail gate allows access through the rear of the trailer and features two lockable T handles

The lid opens with the assistance of gas struts and has a roof rack consisting of three powder coated cross bars for mounting tents or other accessories.

Two side boxes are mounted to the main cargo box one on each side. Side boxes have locking T handle.

Fenders are formed using aluminum tread plate.

All openings to the trailer are sealed with automotive style rubber bulb seals

The base trailer does not include tires and rims as most owners wish to match their tow vehicles tires, rims and bolt patterns.
