

The Engel fridges come in 35 liter, 45 liter, 60 liter, and 80 liter sizes. The most popular fridge is the 45 liter as it offers a small foot print but is tall enough to hold 1 liter bottles upright. The fridges use small low amperage compressors and work on the same principal as you fridge at home. The fridges can be set to work as a cooler, fridge, cold fridge, or freezer. The Engle fridge can also work on 110 volt house hold current. If you require a fridge and a freezer we recommend two Engle 45 liter fridges, one in the trailer and one in the back of the vehicle.

COST: 45 liter Engle Fridge US \$696.00

ENGLE TRANSIT BAG

An insulated transit bag is available for the 45 liter fridge. This extra layer of insulation is very helpful in hot climates and reduces the amount of current drawn by the fridge.

COST: US \$123.00

The ENGLE LOCKING PLATE is mounted to a solid surface and allows the Engle fridge to be locked into place securely and released with the push of a button. The locking plate is used in Chaser trailer and vehicle application

COST: US \$70.00

SLIDING TRAY Our heavy duty full extension slide allows you to mount a 45 liter fridge in the back of the trailer and have it slide out over the tailgate and clear the main cargo box. The full extension allows for easy access into the fridge through the fridge lid. The slide can be used in Horizon trailer and vehicle applications

COST: US \$ 305.00

PAHAQUE TEEPEE The Teepee is a privacy enclosure that can be used as a changing room, shower, or portable potty. The floor can be unzipped if the shelter is being used as a shower. The Teepee offers features such as a shelf for clothing and pockets for shampoo and soap.

The Tepee, the camping industry's first fully equipped portable outhouse by Paha Que', provides a "common sense" evolution in campsite restroom and shower facilities. Featuring 67" (1702 mm) vertical walls, floor measurements of 54" x 54" (1372 mm x 1372 mm), and a peak that reaches 94"(2388 mm). The Tepee is lightweight, portable, and easily stows in a 8" x 26" (203 mm x 660 mm) zippered carry bag that weighs about 10 pounds (4.5 kg). Easy to follow instructions sewn inside the carry bag promise a five minute one-person setup

THE TEPEE OUTHOUSE SPECIFICATIONS Measurements: Floor Size: 54" x 54" (1372 mm x 1372 mm), removable Size at Height of 5'6" (1676 mm) : 36" x 36" (914 mm x 914 mm) Inside height: 94" "(2388 mm) at peak Zipper Door Dimensions: 57" high x 32" wide, 8" off ground 4" (1148 mm H x 813 mm wide, 203 mm off ground 102 mm) Wide Netting Strip at Wall Bottom, Except Door Wall Netting From 5'8" to Top (1727 mm); Four 104" Poles (2642 mm) , Main Vertical; Four 48" (1219mm) Poles, Top Horizontal

Materials: Sidewall fabric: 150D polyester oxford weave, with heavy-duty polyurethane waterproofing Floor Fabric: 100% high-tenacity nylon, 6.5 oz. 210 denier oxford with heavy-duty polyurethane waterproofing Poles: Fiberglass or Aluminum alloy with shock-corded pole sections Outside Pole Diameter: 0.5" (12.7 mm) Roof and Wall Mesh: Rugged 2.3 oz. poly filament 75 denier polyester knit, "no-see-um" roof Zippers: YKK brand nylon coil with corrosion-resistant nickel plated sliders

Special features: "No-see-um" mesh roofing and bottom side panels were added to enhance ventilation The detachable heavy-duty, waterproof flooring engineered to allow drainage of shower run off and to keep the bugs out Rain fly includes unique clear vinyl panels, that warm the shower bag (not included) when rotated to face the sun Stows in duffel style carry bag with straps, 8" in diameter and 26" long (203 mm x 660 mm) Easy one person set up in under 5 minutes

COST: US \$ 199.00

All metal constructed multi axis coupler. The coupler fits all standard hitches and receiver tube and allows for full motion between the vehicle and trailer when off road. The coupler has been certified for use on road in North America.

SAFETY: This is a heavy duty product. These hitch and couplers are designed and manufactured by a blacksmithing family who trace their skills back five generations. All units conform to the requirements of SAE standard J684 and are tested by independent labs.

360° ROTATION & THREE AXIS OF MOVEMENT: This eliminates twisting damage to vehicle & trailer frames caused by sudden changes in vehicle-trailer orientation while off roading.

POSITIVELY SECURED CONNECTION: Once the latch plates are locked in place the Multi Axis Coupler will never pop off like ball hitches do. Everything is in plain view to eliminate any question of whether or not the trailer is hitched correctly. The positively secured connection keeps you in control so minor mishaps on the road don't turn into major accidents.

EASY TO USE Muti Axis Couplers have a wider range of movement makes it easy to couple and uncouple.

DRIVING COMFORT: The Multi Axis Coupler provides a very tight, close fitting connection that eliminates "thunk & jerk" action of conventional hitches. Nearly any terrain can be negotiated safely making this hitch ideal for off road. The 360 degrees rotation along with the left to right and up and down articulation allows fantastic maneuverability especially when backing a trailer into position.

COST: US \$207.00

An effective but simple way to stabilize the rear of the trailer when it has been unhooked from the vehicle. Stops the tongue from rising up due to excessive weight on the tailgate. A must for safety when children are around.

COST: US \$ 79.00
